vitamins; distribution of B-vitamins and amino acids in foods; synthesis of unsaturated
fatty acids; isolation and chemistry of physiologically active natural products, natural
pigments, coenzyme A; rat labyrinth factor, antimycin A, cytokinins, trichothecenes
and mycotoxins. Mailing Add: 625 Anthony Ln Madison WI 53711

Request help for memoir on Tatum

Dear Frank

I just learned you were at
Utrecht the year before Ed was ('36-'37).
So you hoped you might be able to
clear up just what Ed expected to
learn there; what work he did with
Kögl; how he felt about that.

All of which could help illumina-
te just what he brought to the
collaboration with Beadle

Needless to say, anything
(else) you could add to the picture
would be most welcome.

Sincerely,

Joshua
